DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/129,433, filed on 06 May 2002.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 17 November 2003 was filed and is being considered by the examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1:

-Insert --and-- after "an adjustment mechanism" in line 5

In the specification:

-Insert --, now U.S. Patent No. 6,672,707.-- after "May 6, 2002" on page 1, line 1.

Allowable Subject Matter

4. Claims 1-7 are allowed.

Reasons for Allowance

5. The primary reason for the allowance of claim 1 is the inclusion of the step of operating the adjustment mechanism of at least one mounting site to effect minute adjustments of the position of the corresponding printhead module with respect to the support frame; wherein the adjustment mechanism includes an input lever fulcrumed against the support frame for acting on a module engagement plate, the module engagement plate connected to the support frame by hinged link arms such that the resilient movement of the plate is substantially linear. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fabbri (US 6,068,367), Drake (US 5,160,945), Asai et al (US 5,148,194), Pond et al (US 5,057,854), and Chan et al (US 5,016,023) all disclose an array of inkjet printhead modules attached to a support frame or base plate for printing in page width printing.
